

PGDCA

PROGRAMME OUTCOMES:

- It will give the students the abilities needed to create and develop information technology applications.
- The PG Diploma is designed for graduates with a background in computing and offers a thorough coverage of the key concepts and challenges in data and resource protection and computer software security.
 - Students will be able to learn about the most recent developments in a variety of computer and information technology related subjects.
 - To provide students with practical experience while creating real-world IT applications for their studies.
 - To instruct graduate students in the fundamentals of information technology and computer technology applications.
 - Create and implement programmes to examine and resolve any issue pertaining to computer science.

PROGRAMME SPECIFIC OUTCOMES:

- To introduce students to open source technologies so they can learn about them and look for suitable opportunities in business and commerce.
- Capable of using current and suitable programming approaches to deliver technically sound social solutions to real-world issues.
- Create applications that satisfy any required needs while taking into account the relevant societal and industrial factors.
